Health, Safety, and Operational Efficiency

GPS-based vehicle and worker tracking are an essential tool for HSE programs in the energy and mining industries. Significant human welfare and financial benefits are achieved with very low cost per asset.

FMS takes you beyond simple tracking by providing the information you need to improve the safety, productivity, and profitability of your fleet.

FMS provides in-vehicle hardware, satellite communication services, and support for a complete solution.

The Iridium network of satellites insures global availability and near real-time communication of data between field teams and headquarters.

◀ Boost Productivity

Get the most from fleet assets. Extend vehicle uptime through better fleet management. Reduce driver fatigue for more effective operations.

◀ Improve Driver Behavior

Reduced speeding and prevention of unauthorized use reinforces policy compliance. Awareness and accountability support risk reduction measures.

◀ Secure Worker Travel

With the threat of theft and vehicle hijacking, FMS push-button emergency messaging can make the difference. Workers in a disabled vehicle can signal for help.

◀ Save Fuel and Extend Tire Life

By controlling vehicle speed and monitoring idle time, fleets reduce fuel consumption, lower emissions, and extend tire life.

While the safety and security of vehicles and drivers are your top priority, you can also be assured of the rapid return on investment in FMS. Saving lives, preventing crashes, and providing security also reduce costs associated with incidents, liability, fuel, and operations. Many FMS clients see payback within one year.

FMS Technical Support & Professional Services

Client satisfaction, results and continuous return on investment begin with quality training and installation support.

FMS works closely with every client to ensure system installation and deployment are complete and on schedule.

FMS Exploration & Production Customer Results

KJM Contractors

"FMS has helped our company confirm its reputation as an industry leader in mining. FMS had by far the most efficient solution to meet our needs."

—Kim McNamara, Managing Director, KJM Contractors, Australia

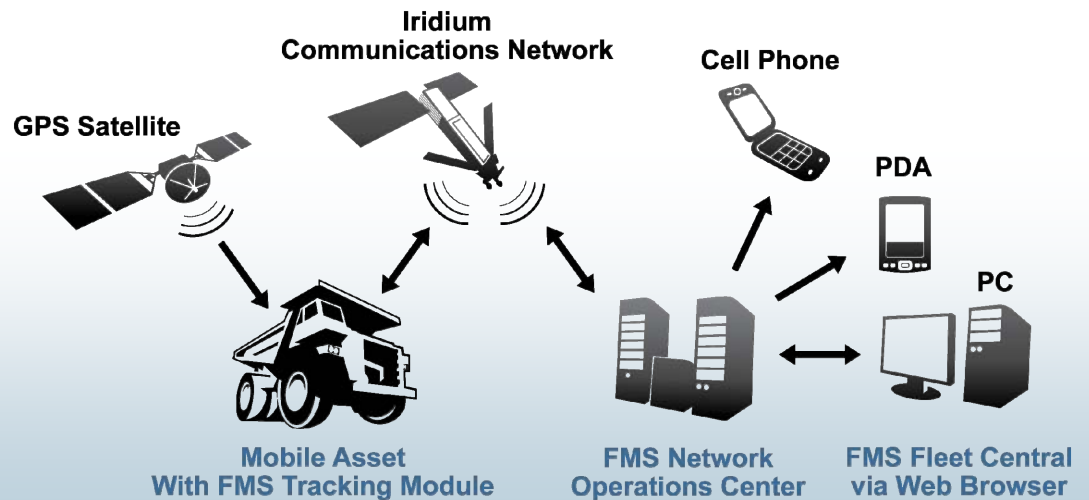

Coeur d'Alene Mines Corporation

FMS satellite alerts provide near real-time awareness of driver emergencies. Travel for 8-10 hours from the Palmarejo mine in Mexico to the nearest commercial center can be hazardous.

Agnico Eagle Mines

Geologists and exploration teams spend many hours traveling between jobs. Safety and security are critical during those times, and FMS provides the tools for tracking and emergency alerts.

About Fleet Management Solutions, Inc.

Fleet Management Solutions provides GPS and all-satellite fleet tracking and monitoring with 100% remote coverage and two-way communications. FMS manufactures rugged and reliable on-board equipment and web-based mapping and reporting tools. FMS clients improve asset utilization, safety, and productivity while reducing theft and the costs associated with fleet operation, management, insurance and deployment. FMS is a total solution provider for all fleet tracking requirements, including satellite communications services.
